Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-8 and 22-28 drawn to a ladder, classified in class 182, subclass 93.
- II. Claims 9-21, drawn to a method of providing a vehicle, classified in class 280, subclass 163.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as set forth in claims 1 and 22 can be used for accessing an above ground swimming pool.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
